Utah 2025 Harvest Results

CURRENT UTAH DWR DASHBOARDS - accessed August 28, 2026

This visitor report presents 1,141 hunt-code harvest rows across 8 species groups. The hunt-code rows sum to 143,418 hunters afield and 48,574 harvested animals; annual-report statewide totals may differ because DWR projects hunt, unit, and statewide estimates separately.

The 2025 hunt rows are reconciled to DWR's current harvest dashboards. DWR has not published a full 2025 annual age and herd-composition report, so the elk age and deer buck-to-doe tables remain the latest verified 2024 management context and are not labeled as 2025 observations.

These are historical harvest and management-quality references. They must not be used as current permit quotas or direct draw probabilities.

Species summary

Species	Hunt rows	Hunters afield	Harvest	Median success
Elk	471	65,208	16,381	60.0%
Deer	421	74,532	29,396	60.0%
Pronghorn	124	3,034	2,221	86.0%
Moose	43	202	188	100.0%
Bison	18	170	141	96.7%
Desert Bighorn Sheep	25	99	87	100.0%
Rocky Mountain Bighorn Sheep	21	64	62	100.0%
Mountain Goat	18	109	98	100.0%

Summary totals are sums of the retained hunt-code rows. Median success is the median of the published hunt-level success rates, not a statewide weighted rate.

Elk management-quality context

Average age is the observed age of harvested limited-entry bull elk from the 2024 annual report. The three-year average and age objective are cross-checked to the current Hunt Planner database fields. Observed annual age, three-year average, and management objective remain separate metrics.

Unit	Management unit	2024 avg age	3-year avg	Age objective	2024 status	3-year status	Hunt Planner

Mule deer management-quality context

Deer quality is represented by postseason bucks per 100 does. This table keeps the observed 2022, 2023, and 2024 ratios, the three-year average, and each unit's objective band together. Deer age is not substituted for the buck-to-doe measure.
