Utah 2020 Harvest Report

VERIFIED OFFICIAL DWR PDF

This report assembles 939 official DWR hunt-code rows across 8 species groups. The retained rows sum to 94,910 hunters afield and 32,472 harvested animals. DWR statewide estimates may differ from sums of hunt-code rows because DWR projects statewide and hunt-level estimates separately.

Harvested age is available for 17 rows; a DWR-reported three-year harvested-age value is available for 0 rows. Annual age and DWR-reported three-year age are separate fields. A blank means the official evidence does not provide that measure for the matched hunt code; no value is inferred.

Permit counts in this historical harvest report are source-year harvest-report fields only. They are not the current quota authority and are not used directly as draw probability.
