VERIFIED DWR ANNUAL PACKAGE

Utah 2021 Harvest Report

VERIFIED DWR ANNUAL PACKAGE

This report assembles 974 official DWR hunt-code rows across 11 species groups. The retained rows sum to 84,170 hunters afield and 34,195 harvested animals. DWR statewide estimates may differ from sums of hunt-code rows because DWR projects statewide and hunt-level estimates separately.

Harvested age is available for 345 rows; a DWR-reported three-year harvested-age value is available for 0 rows. Annual age and DWR-reported three-year age are separate fields. A blank means the official evidence does not provide that measure for the matched hunt code; no value is inferred.

Permit counts in this historical harvest report are source-year harvest-report fields only. They are not the current quota authority and are not used directly as draw probability.

Species summary

Species	Rows	Permits	Hunters	Harvest	Median success	Age rows	3-year age rows
