

2025-27 Utah Conservation Permits Explained

A readable guide to Utah's multi-year conservation permit allocation: what the official list contains, how those permits relate to hunt codes, and which numbers must remain separate.

336	\$8.17M	2025-27
UNDUPLICATED PERMITS EACH YEAR	OFFICIAL LISTED TOTAL VALUE	MULTI-YEAR ALLOCATION CYCLE

ONE PERMIT MAY COVER MULTIPLE COMPATIBLE HUNT CODES - DO NOT ADD REPEATED COVERAGE

The official DWR working list contains 336 conservation permits for each year of the 2025-27 cycle. The reviewed UOGA crosswalk groups those individual rows into 271 species/area/condition records and identifies 418 hunt codes that show compatible coverage.

This is an allocation guide, not a public-draw odds report and not a hunter-participation report. Conservation permits remain a separate special-permit overlay unless an official source explicitly identifies a public-draw quota.

Annual conservation allocation by species

Annual permits are counted once. Area/condition records consolidate identical allocation descriptions. Hunt-code coverage is a search aid showing where those permits may apply.

Species	Annual permits	Area / condition records	Hunt codes showing coverage
Antlerless Elk	20	13	5
Bear	44	31	100
Bison	6	6	19
Deer	39	36	43
Desert Bighorn Sheep	8	8	16
Elk	91	88	136
Moose	5	5	5
Mountain Goat	7	7	10
Pronghorn	69	53	58
Rocky Mountain Bighorn Sheep	6	6	13
Turkey	41	18	13
TOTAL	336	271	418 unique

Non-additive warning: the crosswalk displays 1,454 permit-to-code assignments because some permits cover several hunt codes. The official program total remains 336 annual permits - not 1,454 permits.

The official list's dollar amount is the total listed value of the permit allocation. It is not a forecast of hunter participation, harvest, or public-draw demand.

Five conservation-only antlerless elk hunt codes

The current 2026 Hunt Planner identifies these five conservation hunts. Each has four conservation permits from the 2025-27 allocation, for 20 unduplicated antlerless elk conservation permits. Their public-draw quota remains blank because these are conservation-only records.

Hunt code	2026 Hunt Planner name	Species	Weapon	Public-draw quota	Conservation permits
EA1180	La Sal (Conservation)	Antlerless Elk	Any Legal Weapon	Not published	4
EA1270	Fishlake (Conservation)	Antlerless Elk	Any Legal Weapon	Not published	4
EA1271	Manti (Conservation)	Antlerless Elk	Any Legal Weapon	Not published	4
EA2041	Cache (Conservation)	Antlerless Elk	Any Legal Weapon	Not published	4
EA2045	Wasatch Mtns (Conservation)	Antlerless Elk	Any Legal Weapon	Not published	4
TOTAL				Not additive	20

PUBLIC-DRAW PERMITS	CONSERVATION PERMITS	HUNTERS AFIELD
Permits offered through an applicable public drawing. Use the published resident, nonresident, and total quota fields.	Special permits allocated through approved conservation organizations. Keep them separate from public-draw quota.	People reported as actually hunting. Use the official harvest report; do not infer this number from permits issued.

Do not merge conservation permits into resident/nonresident public-draw totals. Do not convert issued or auctioned permits into hunters afield. The official harvest report remains authoritative for participation and harvest.

How to use the Conservation Permits folder

The library presents the documents in the order a public user should read them: explanation first, official evidence second, detailed hunt-code lookup third.

1	Start here: Conservation Permits Explained Read the annual totals, species breakdown, and non-additive warning before comparing hunt codes.
2	View Official Source Open the official DWR 2025-27 working list for the individual species, area, condition, value, and organization rows.
3	Open the 2026 comprehensive register Use the 60-page hunt-code register when you need exact public quota, EXPO subset, or conservation coverage by hunt code.
