Utah DWR source data | U.O.G.A. Hunt Builder visitor reference

Utah 2024 Harvest Results

FINAL VERIFIED 2024 PACKAGE

This visitor report presents 1,039 hunt-code harvest rows across 11 species groups. The hunt-code rows sum to 85,220 hunters afield and 32,945 harvested animals; annual-report statewide totals may differ because DWR projects hunt, unit, and statewide estimates separately.

Elk quality is shown with observed 2024 average harvested age, the 2022-2024 three-year average, and the management age objective. Deer quality is shown with postseason bucks per 100 does rather than deer age.

These are historical harvest and management-quality references. They must not be used as current permit quotas or direct draw probabilities.

Species summary

Species	Hunt rows	Hunters afield	Harvest	Median success
Elk	215	4,552	2,933	72.7%
Mule Deer	334	65,472	22,863	52.5%
Antlerless Elk	184	13,051	4,773	38.6%
Antlerless Deer	21	11	200	13.0%
Pronghorn	87	1,643	1,405	84.6%
Black Bear	87	0	339	40.0%
Moose	37	184	179	100.0%
Bison	16	74	46	5.0%
Desert Bighorn Sheep	21	80	74	100.0%
Rocky Mountain Bighorn Sheep	20	63	62	100.0%
Mountain Goat	17	90	71	5.0%

Summary totals are sums of the retained hunt-code rows. Median success is the median of the published hunt-level success rates, not a statewide weighted rate.

Elk management-quality context

Average age is the observed age of harvested limited-entry bull elk from the 2024 annual report. The three-year average and age objective are cross-checked to the current Hunt Planner database fields. Observed annual age, three-year average, and management objective remain separate metrics.

Unit	Management unit	2024 avg age	3-year avg	Age objective	2024 status	3-year status	Hunt Planner

Mule deer management-quality context

Deer quality is represented by postseason bucks per 100 does. This table keeps the observed 2022, 2023, and 2024 ratios, the three-year average, and each unit's objective band together. Deer age is not substituted for the buck-to-doe measure.
